

## Icon Rocks

1) Get a smooth rock from backyard, or from Home Depot (sold in small bags in garden section).

2) Coat the rock with regular white glue using a paint brush. The more, the better!

Mod Podge (sold in craft stores, which is a thick white glue) works good too.

3) Cut out an icon image, the size of the rock, and lay it on top of the glue. Cover the image with more white glue, using a paint brush. Let dry! The white glue will dry clear. It's okay to add a few more layers of white glue on top of the image.
